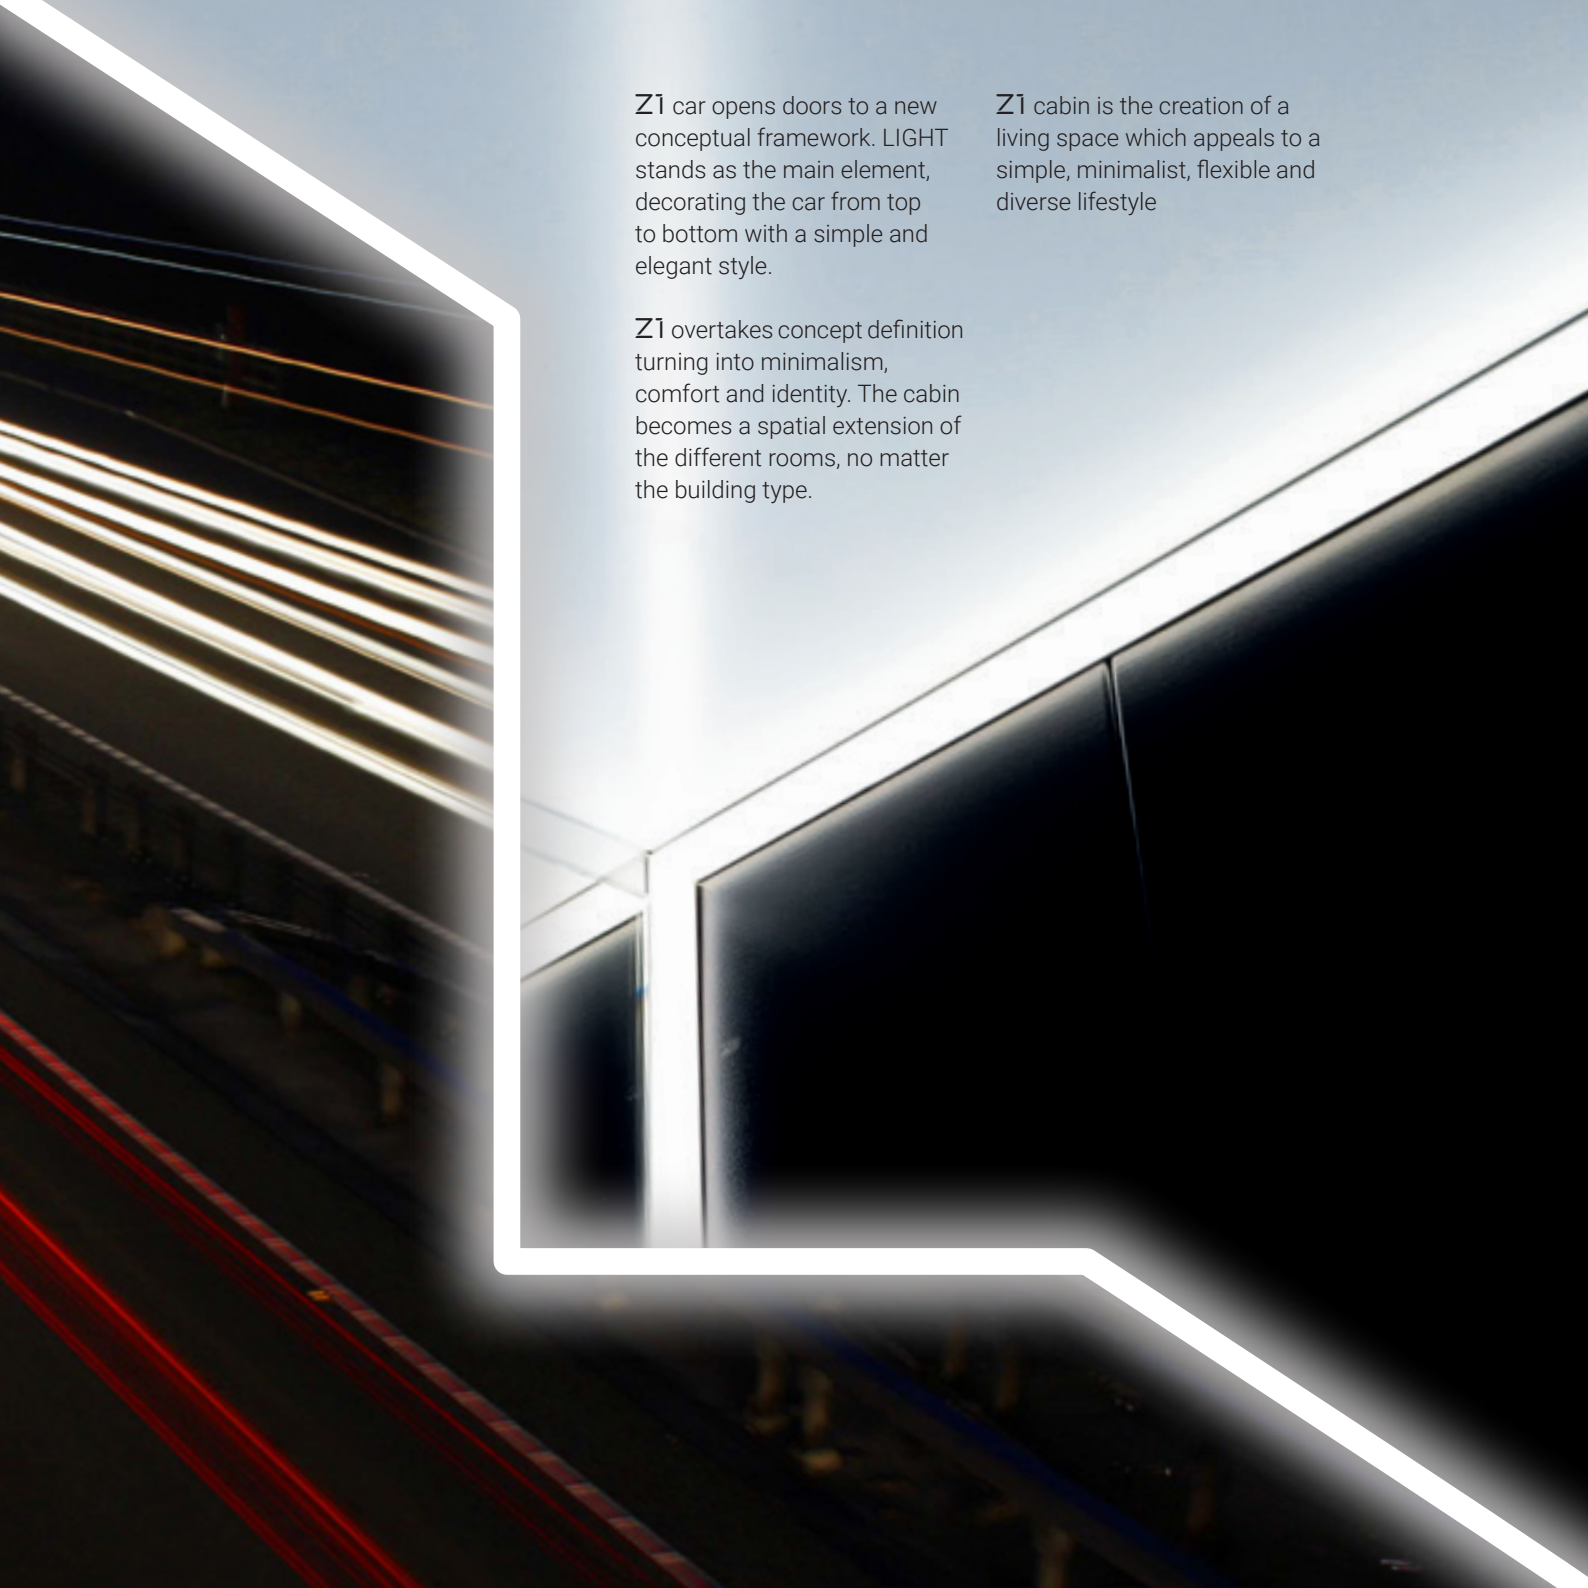
less**is**more...

When lighting builds a different space, simple and minimalist, marking the sobriety and identity of our brand



Z1 car opens doors to a new conceptual framework. LIGHT stands as the main element, decorating the car from top to bottom with a simple and elegant style.

Z1 overtakes concept definition turning into minimalism, comfort and identity. The cabin becomes a spatial extension of the different rooms, no matter the building type.

Z1 cabin is the creation of a living space which appeals to a simple, minimalist, flexible and diverse lifestyle

CONCEPT

Zi + CONFORT

Multidirectional lighting creates a comfortable atmosphere different to what is usually conceived as the classic lift.

Zi + SIMPLICITY

Spatial minimalism and pure lines join in an intentionally simple design.

Zi + UNIFORMITY

Passenger and lift are connected through the easily identifiable COP which is built into the sole car panel.

Zi + QUALITY

PORCELANOSA Group porcelain floor emerges to make a difference, thanks to its high performance.

Zi + SAFETY

Design is developed far exceeding standards required by current regulations.

Zi + SPACE

Clear ceiling gives the lift user a spacious feeling.

Zi + CONNECTIVITY

La 3.0 link between car and passengers comes to life with access to information in real time.
